

IEEE BMSB 2020: Workshop between Japanese and French students

The current health crisis makes school changes their way to do classes. They have to be more creative, more adjustable to continue to provide high-quality teaching. It is in that optic that the Institut Supérieur d'Electronique de Paris makes some improvement. They implement some technologies in order that students and teachers can do classes during the lockdown. Since the start of the school year, students could try hybrid classes out. There is not just school which has to adapt. The associations must to find new way to work it out like do their meeting in video conference. The student branch IEEE makes adjustment to continue to work. This workshop presents ISEP and MEIJI University student branch, our work and how we adapted to continue working in this health context.

Workshop agenda: (29/10/2020)

Time	Topic
12.00 -12.05	Introduction to ISEP Student branch <ul style="list-style-type: none"> a. Presentation of ISEP and the association GarageISEP (our projects) b. Who are the members c. What do we do d. What does this branch bring us
